Santhosh S S

Data Scientist — GenAI & Agentic AI — Python — SQL — Machine Learning

+91 81971 33537 | santhutsk3@gmail.com | LinkedIn | GitHub

Professional Summary:

Data Scientist aspirant and Electronics & Communication Engineering undergraduate (2026) with hands-on experience in Python, SQL, Machine Learning, and Generative AI. Built a Retrieval-Augmented Generation (RAG) pipeline using FAISS vector search, HuggingFace embeddings, NLP-based text normalization and document chunking, and Google Gemini-powered orchestration. Strong foundation in data cleaning, EDA, statistical analysis, and model development, with practical knowledge of REST APIs, FastAPI, and Pydantic for serving AI/ML solutions.

Technical Skills & Certifications:

Programming: Python, SQL, C++ (Basics)
Agentic AI & GenAI: RAG pipeline development, NLP text normalization, document chunking, FAISS vector search, HuggingFace embeddings, semantic retrieval testing, Google Gemini-powered GenAI orchestration
Machine Learning: Regression, Classification, Feature Engineering, Model Evaluation, Predictive Analytics, Scikit-Learn, Pipeline, PCA, K-Means
APIs & Backend: REST APIs, FastAPI, Pydantic, Postman, Django (Basics)
Automation & DevOps: n8n (Basics), Linux Commands, CI/CD Understanding, Git, GitHub, Docker
Data Science & Analysis: Data Cleaning, Data Transformation, EDA, Statistical Analysis, Data Validation, KPI Analysis, Web Scraping (Beautiful Soup, Selenium)
Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Pydantic
Visualization & BI: Power BI, Tableau (Beginner), Excel, Dashboards
Databases: Oracle SQL, PostgreSQL (Basics), SQL Joins, Aggregations, Snowflake
Tools: VS Code, PyCharm, Jupyter Notebook
Certifications: FastAPI – LinkedIn Learning, NPTEL Joy of Computing using Python (2023)
Professional Training: QSpiders – Python Data Science (Ongoing)

Work Experience:

QSpiders — Bengaluru, Karnataka

Python Data Science Trainee — *Aug 2025 – Present*

- Performed data cleaning, preprocessing, exploratory data analysis (EDA), and statistical analysis on structured datasets to generate real-time insights.
- Built and evaluated machine learning models (Scikit-Learn) for classification and regression tasks, focused on predictive analytics.
- Queried and aggregated data from SQL databases to support business reporting and decision-making.
- Developed dashboards and reports using Power BI, Excel, and Python visualization libraries.

Projects:

GenAI Document Retrieval & RAG Pipeline

Python, FAISS, HuggingFace, Google Gemini, NLP — *2025*

- Designed and built a RAG pipeline covering NLP text normalization, document chunking, and semantic vector search using FAISS.
- Integrated HuggingFace embeddings with Google Gemini for context-aware GenAI response orchestration; validated retrieval accuracy through structured testing.

Money Mentor AI — Expense Tracking and Budget Dashboard

Python, FastAPI, LangChain, Ollama, SQLite — *2026*

- Built a personal finance app that uses a local Ollama LLM to log natural-language expenses and track spending against category budgets.
- Developed FastAPI endpoints and an interactive dashboard to display expenses, budget status, and AI-generated financial reports.

Fruit Spoilage Detection System

Python, Scikit-Learn, Data Analytics — *2025*

- Collected, cleaned, and analyzed sensor and image datasets for predictive spoilage detection.
- Applied machine learning and visualization techniques to identify spoilage patterns and improve prediction accuracy.

Education:

G M Institute of Technology — Davangere, Karnataka

B.E. Electronics and Communication Engineering – CGPA: 7.7/10 — *2022 – 2026*
